Blackjack is a game of skill and strategy, but it is also a game of chance. There is no guarantee that you will win every hand, but by following the strategies and techniques outlined in this book, you can improve your odds of winning and reduce your losses.

So what are you waiting for? Order your copy of **Blackjack: Advanced Strategy and Expert Tips** today and start winning more money at blackjack!

Chapter 1: Blackjack Basics

Understanding the Game

Blackjack, also known as twenty-one, is a popular card game played in casinos around the world. The goal of the game is to beat the dealer by getting a hand total as close to 21 as possible without going over.

The game is played with a standard 52-card deck. Aces can be counted as either 1 or 11, face cards (Kings, Queens, and Jacks) are worth 10, and all other cards are worth their face value.

To start the game, each player is dealt two cards face up. The dealer is also dealt two cards, but one of the dealer's cards is dealt face down.

Players can then choose to hit (take another card), stand (keep their current hand), double down (double their bet and receive one more card), or split (if they have two cards of the same value, they can split them into two separate hands).

The dealer must hit on any hand total of 16 or less and must stand on any hand total of 17 or more.

If the player's hand total exceeds 21, they bust and lose their bet. If the dealer's hand total exceeds 21, the dealer busts and all players who have not busted win their bets.

If the player and the dealer have the same hand total, it is a push and the player's bet is returned.

Blackjack is a game of skill and strategy. By understanding the basic rules of the game and using sound strategy, players can improve their odds of winning.

Chapter 1: Blackjack Basics

Card Values and Payouts

In blackjack, the value of each card is as follows:

- Number cards (2-10): Face value
- Face cards (Jack, Queen, King): 10
- Ace: 1 or 11, at the player's choice

The goal of blackjack is to get a hand total as close to 21 as possible, without going over. The dealer must hit on 16 or less and stand on 17 or more.

The payouts for winning hands in blackjack are as follows:

- Blackjack (21): Pays 3 to 2
- Win: Pays 1 to 1
- Push (tie): No payout
- Loss: Loses bet

It is important to note that the payout for a blackjack may vary depending on the casino. Some casinos pay 6 to 5 for a blackjack, while others pay 3 to 2.

In addition to the basic payouts, there are also a number of side bets that can be made in blackjack. These side bets typically have higher payouts, but they also have a higher house edge.

Some of the most common side bets in blackjack include:

- Insurance: Pays 2 to 1 if the dealer has a blackjack
- Even money: Pays 1 to 1 if the player has a blackjack and the dealer has an ace upcard
- Double down: Allows the player to double their bet after the first two cards are dealt
- Split: Allows the player to split a pair of cards into two separate hands

Side bets can be a fun way to add excitement to your blackjack game, but it is important to remember that they have a higher house edge than the basic game.

Chapter 1: Blackjack Basics

Basic Strategy

Blackjack basic strategy is a set of rules that tells you the best way to play your hand based on the dealer's upcard and your own hand. It is based on mathematical calculations that take into account the probability of winning or losing with each possible action.

Basic strategy is not a guarantee that you will win every hand, but it will give you the best possible chance of winning in the long run. It is important to learn basic strategy before you start playing blackjack for real money.

There are many different basic strategy charts available online and in books. You can also find basic strategy trainers that can help you to practice playing blackjack using basic strategy.

Once you have learned basic strategy, you can start to experiment with more advanced strategies. However, it is important to have a solid understanding of basic strategy before you move on to more advanced strategies.

Here are some of the key principles of basic strategy:

- **Always hit on 16 or less.**
- **Always stand on 17 or more.**
- **Double down on 11 against a dealer's 2-10.**
- **Split pairs of 8s and aces.**
- **Surrender on 16 against a dealer's 9, 10, or ace.**

These are just a few of the basic strategy rules. For a complete list of basic strategy rules, please refer to a basic strategy chart.

Blackjack is a game of skill and strategy. By learning and using basic strategy, you can improve your odds of winning and reduce your losses.

This extract presents the opening three sections of the first chapter.
